Aim

To set out the strategic context for developments in libraries

in order to

Inform the development of collections and information resources

Key issues

Challenges for universities

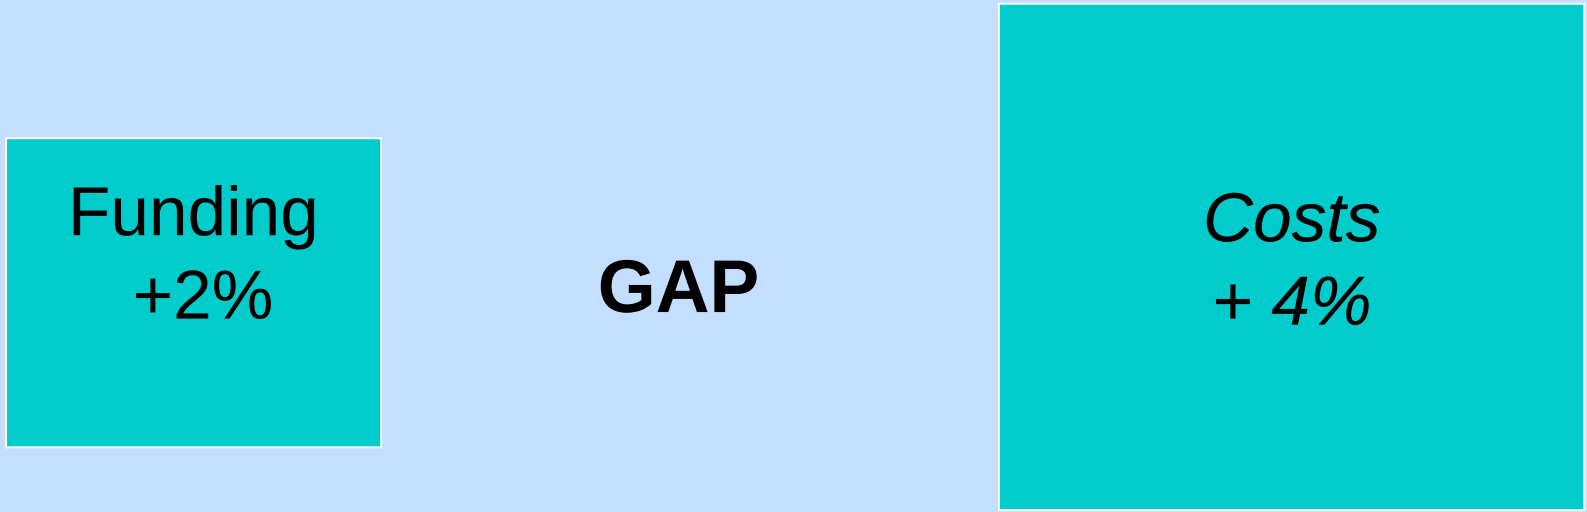
- more students and more diversity
- competition in higher education ‘market’
- financial pressure
- employers’ expectations
- quality and accountability

Top concerns of Library Directors

From SCONUL survey 2004

- compliance issues
- developments in electronic environment
- financial management, pressure on spending
- reconfiguration of sector
- institutional management issues
- staffing
- capacity and configuration of space

The higher education funding gap



Additional funding from student fees

University priorities for expenditure

- Bursaries and grants
- Staff salaries
- Investment in facilities

Student priorities for expenditure

- Libraries
- Campus security
- ….. Staff salaries

Demand for higher education

- *Individuals*
  - personal aspirations
  - financial benefit
- *Employers*
  - demand for skilled employees
  - global competition
- *Government*
  - skills underpin knowledge economy
  - 50% participation target in UK

Lisbon target

Agreement made in March 2000 among the EU Heads of States and Governments to make the European Union

‘the most competitive and dynamic knowledge-driven economy by 2010’.

Global competition

- League tables
- Provision in new economies
- International recruitment patterns
- Global alliances
- Overseas campuses
- Distance learning

Quality and accountability

the National Student Survey

Questions	Survey

Welcome to the National Student Survey

The National Student Survey (NSS) is an opportunity for final year undergraduates to feedback on their academic experience. The results will be used to help future students to choose courses that best suit their needs and interests. This is the second year of the NSS, the first being conducted last year in 2005. The 2005 results have been published on the **Teaching Quality Information (TQI) website**.

The survey is being conducted by **Ipsos MORI**, an independent market research agency, and has the full support of the **National Union of Students (NUS)**.

Final year students will receive an e-mail from Ipsos MORI during January or February 2006 inviting them to complete the survey online. However, if you are in your final year of an undergraduate course you can complete the survey now by clicking on the link **Start Survey**. You will be asked for some personal data in order to verify that you are eligible to take part. The survey is straightforward and should take no more than five minutes to complete.

This website has been designed to be compatible with assistive technologies and provides responses to **Frequently Asked Questions** on the survey. If you have a query which is not answered under this section please **Contact Us** at at Ipsos MORI.

Google Book Search BETA

All the world's books at your fingertips

In May 1961, JFK said that he was going to put a man on the moon. The idea was unthinkable at the time, but within the decade, the goal was achieved.

Google Book Search (books.google.com) is our **man on the moon** initiative. We see a world where **all books are online and searchable***. How exactly will this be done? How long exactly will it take? We aren't sure, but **we're committed to making it happen**.

Imagine this program's potential impact on education and research. On how our children discover books. On writing and publishing. On how all of us find and use information.

Do we need your help? Yes.

Learning and teaching

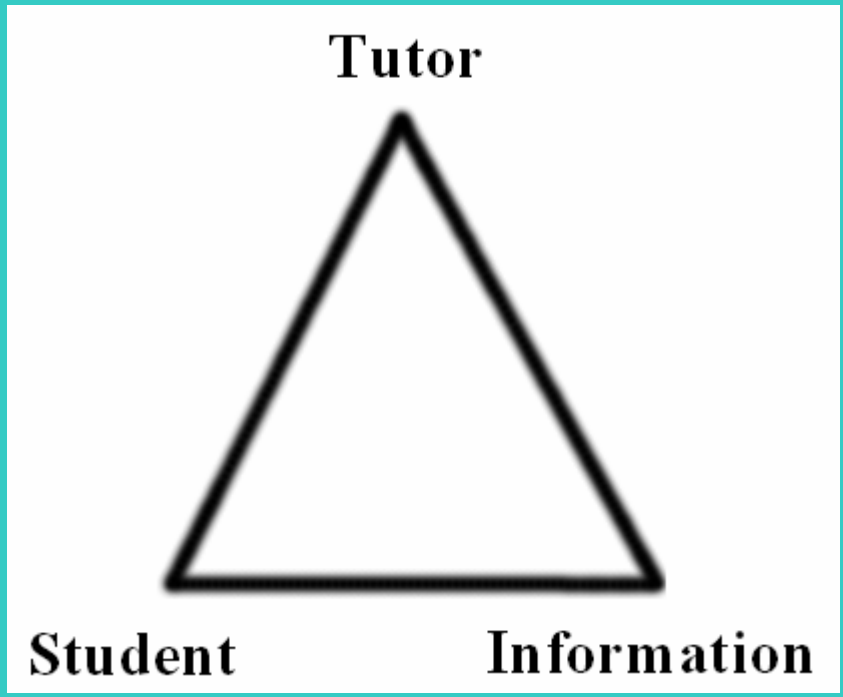
Changes in student expectations

- Students behaving as consumers
- The need to actively engage students in learning
- The demand for flexibility in when and where people study
- New generations of students and their use of technology and multimedia
- The learning needs of each individual

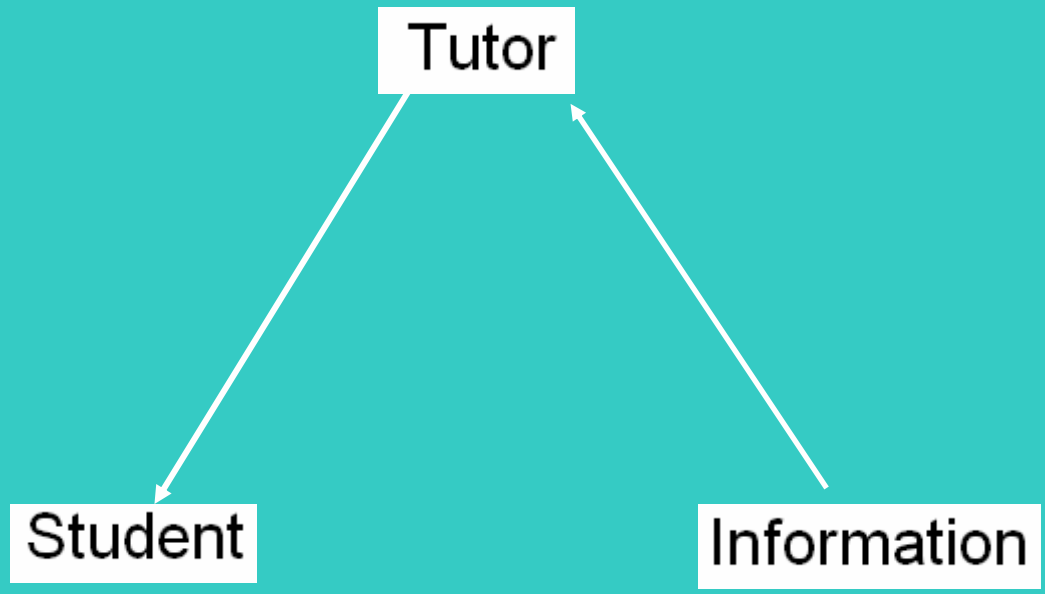
A distinctive style of learning?

The focus on the learning experience of the student is a key feature of British education. It nutures the critical and creative skills which underpin the UK's most successful industries. Books and other information resources play a key role in this educational model, and this places libraries at the heart of the learning process.

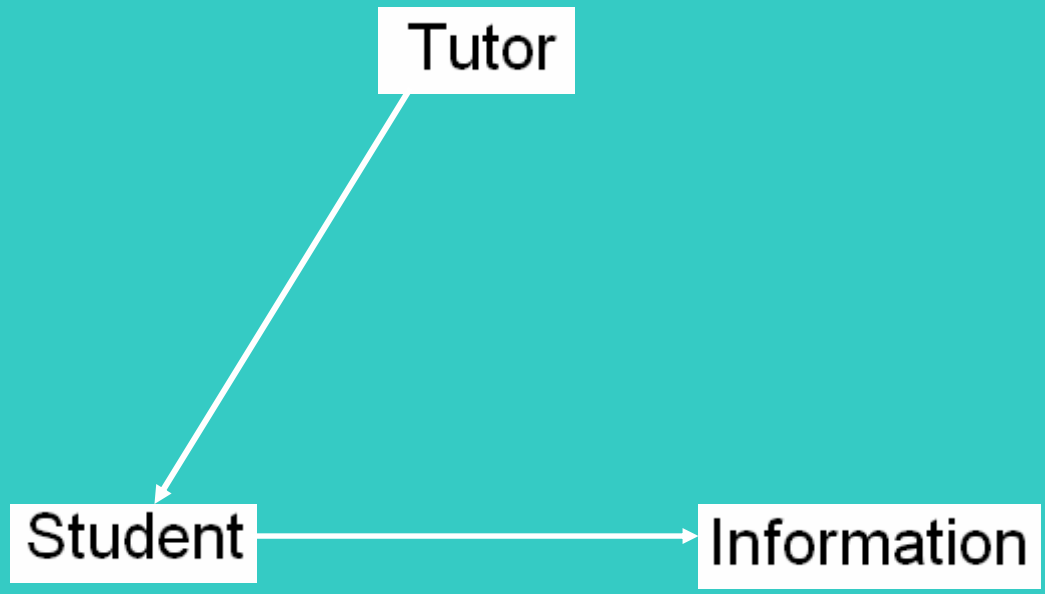
A learning and teaching model



Traditional teaching model



Independent learning model



“Perhaps eventually we will face a world where reading and writing are almost obsolete. If all facts are available to everyone, what will be the need to learn?”

Baroness Greenfield, 2005.

Improved Blackboard Performance
We have achieved a stable and much improved response-time from our Blackboard system, after applying a whole range of fixes and fine-tuning the back-end database.
One of the fixes involves running a script every half an hour (25 and 55 minutes past the hour) to clear out unused sessions on the system. This script causes a small dip in performance (for a couple of minutes). However, we are
Local intranet

The virtual learning environment

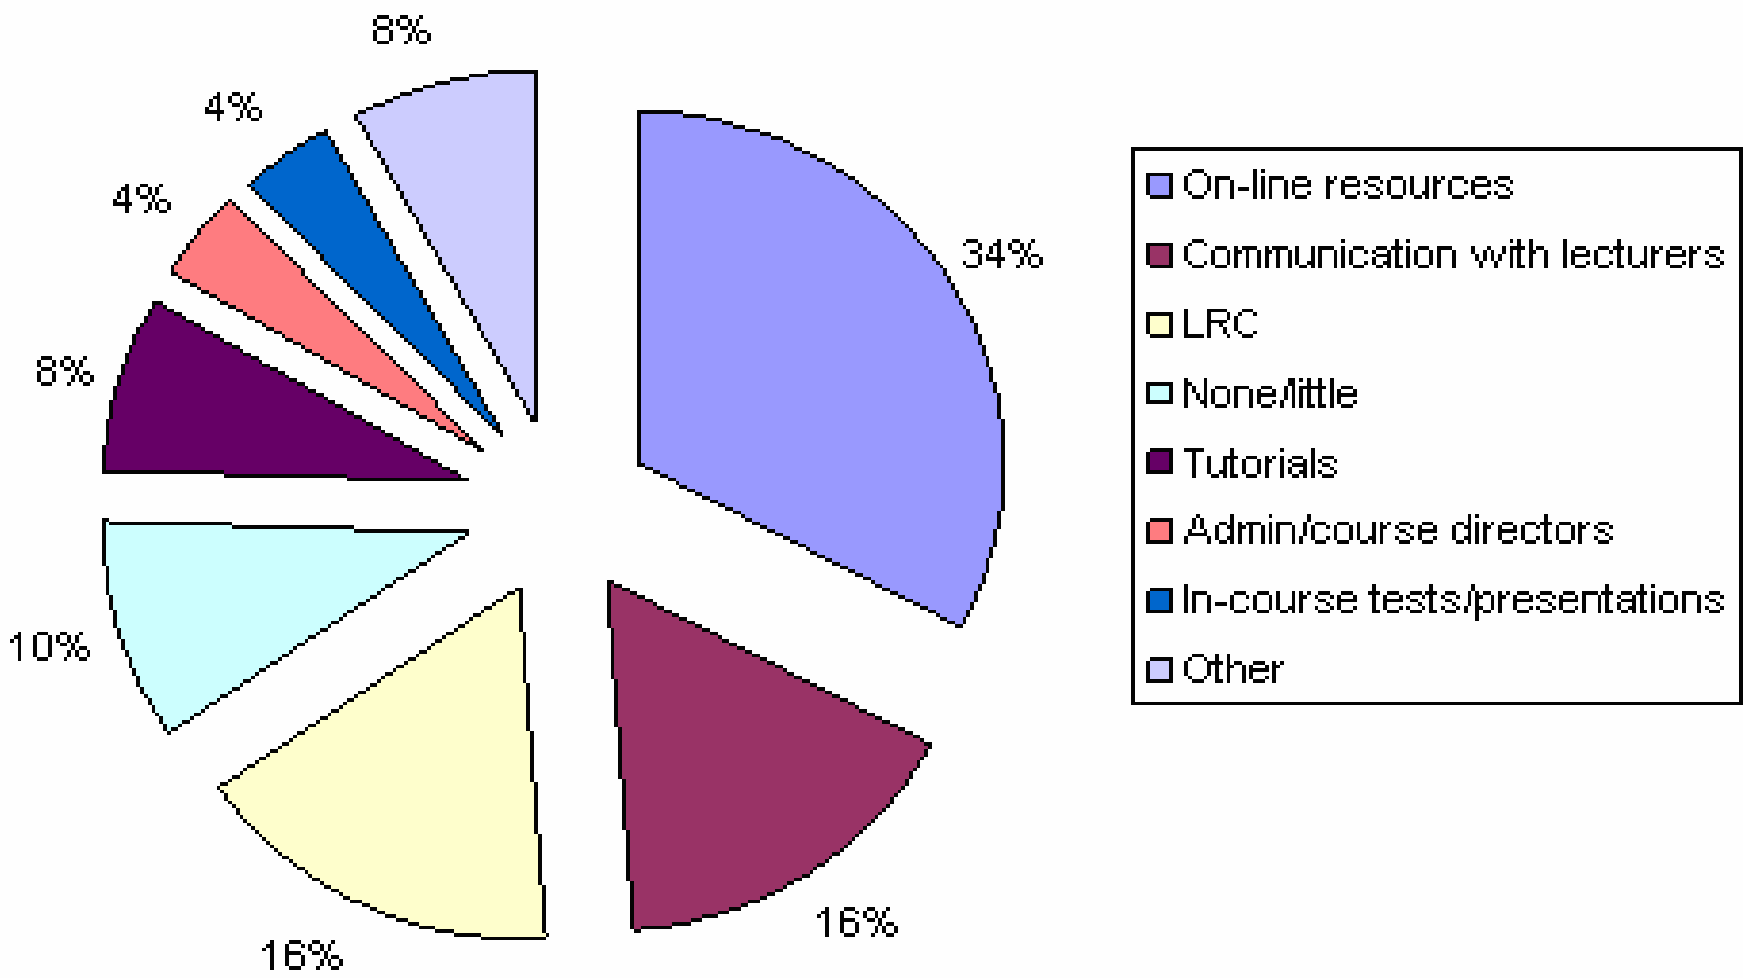
“ The aim is to create an electronic environment which replicates all the facilities of the real environment...

...allowing students to move seamlessly between the two...in a way which meets their own needs.”

The eCampus

- Course information
- Enrolment
- Fees payment
- Learning materials
- Information resources
- Interaction with staff
- Contact with students
- Assignments
- Assessment
- Feedback
- Certification

Academic support found most useful



"It is the view of the group - and research studies reinforce this - that effective learning takes place in a social environment."

Foresight. The Learning Process in 2020 Task Force.

Research

Research trends

- highly competitive
- differences between disciplines
- evidence-based work
- multi and cross disciplinary projects
- eResearch
- shifts in professional boundaries
- links with teaching, innovation

Libraries and research

Current developments

- Training programmes for researchers
- Research Information Network
- SCONUL Research Extra
- ‘Access’ funding
- Collaborative storage projects
- Digital legal deposit

"..by the year 2020, 40% of UK research monographs will be available in electronic form only…"

Lynne Brindley, British Library

An enhanced role for librarians

Given the increasing importance of evidence – drawn from a range of inter-disciplinary and digital sources which require specialist searching and curation skills – it is time for the information professional to take their place as a full member of the research team.

Welcome to "academici. Knowledge networks". Here, you can extend your personal and academic networks.

Good reasons to enroll:

academici is successful, because it combines the interests of

- knowledge workers who are interested in their special interest areas, topics and problems

- people who are interested in relating to others, sharing information and knowledge, but also friendship and life

- institutions who would like to support and enhance their knowledge workers and all the other people dealing with them and their institutions

- companies who spend billions for R&D, but could save millions if they could easier link up with researchers:

- secure data protection, no advertising, no direct sales, no spam

Research agenda

- What are student expectations of their experience at university?
- How do students interact with electronic learning environments?
- What are the changing needs of researchers working in libraries?
- What impact will these changes have on the provision of information resources?

g.bulpitt@kingston.ac.uk
