CONCLUSION

- The Evaluation processes have served as a primus motor for an extensive, multidimensional and long-lasting development
- It can safely be stated that the library evaluations play a vital role in the development of the information services of the University of Helsinki.
- On the other hand, a lot homework remains to be done after the evaluations. The process will go on.

QUESTIONS

- Do we need European recommendations for the quality on the library sector?
- Which kind of role should LIBER have in the development of quality?
