Minimum Number of Participants	10	
Accommodation not included / self organised	We can provide a list of accommodation to help you organise	

Course Description

Are you ready to shape the future of libraries? The Erasmus Staff Week "**Future-Ready Librarians: Embracing Change**" is designed for forward-thinking European academic and research librarians.

Join us as we explore how libraries are adapting to meet the evolving needs of their communities, addressing topics such as digital literacy, research data management, community engagement and advocacy.

Through interactive workshops, expert presentations, and collaborative discussions, this programme will explore innovative approaches to library services and how librarians can reinvent their professions for the challenges and opportunities of tomorrow to become essential partners in research, learning, and community building.
